Washington, DC 20554

Commissioner Abernathy:

My children, two boys, are grown now and I have a 12 year old granddaughter. I can state positively that the violence, sex, and profanity on television is much worse now than it was when my boys were growing up. Television has some really good qualities but it concerns me to see that producers don't think a program can last anytime unless there is a great deal of excessive violence, blood, and guts along with really gross language and, of course, sexual content. My granddaughter is of a divorced family and we, her grandparents, don't know how much she sees of this violence. She is very hyper and it could be that what she has watched has played a part in that. I truly fear for future children if this violence isn't curtailed greatly. Statistics are now showing that children are involved in violent activity at younger and younger ages. There has to be a connection and I believe what they see on tv day after day is a factor. Surely, you don't want America's children to be put in jail or wards due to violent acts, some that are killings. Please, for the sake of our children's future, clean up the airways.

Sincerely,

Mrs. Billie J. Goad
281-351-8538

Commissioner Martin:

I understand that the FCC is considering the ill effects of tv violence. I urge you to do whatever you can to reign in the unnecessary and excessive violence permeating todays programming. I don't even want my children to see many of the commercials that air during primetime for later evening shows. There can't be any benefit to any one regardless of age from watching violent content--only harm. I believe the explicit violence, course language, profanity, and sexual content have gotten out of control and need to be corrected. Thank you for your time.

Sincerely,

Carrie Collins

Commissioner Adelstein:

I implore the FCC to get tough on TV . I cannot trust my children to watch TV unattended, since often we will find when least expected. I especially find the CSI and Law & Order (particularly the SVU) series to be excessively violent. We do not have cable TV due to the undesirable content available via that medium, but broadcast TV is rapidly approaching the same threshold. We must protect our children's minds whenever possible.

Thank you for your time and attention to this matter.

Sincerely,

Kathy Smith

Commissioner Abernathy:

I'm concerned about the impact of coarse language and violence that has become so insidious in practically every venue we as a nation participate in, either willingly or unbeknowst. You are, we need to believe, are our trusted servants. Keeping a sharp eye, a keen mind and attuned ears to all that you and your staff are capable of, is what "We the People" need from you. It's our children we are most concerned about, as they will be running this country soon and what they are exposed to will either affect their thinking processes in a positive & meaningful way or will end up as insensitive, unimaginative and troublesome 'weights' on society. Have you ever read the reports of the altered behavior patterns of children who have been exposed to violence on an 'electronic baby-sitter', (tv)? Its not an encouraging sight. Please do all you can to curb this junk. "We the People" are grateful for your forthright efforts.

Sincerely,

Washington, DC 20554

Commissioner Abernathy:

For those of you still not concerned about how your lack of oversight involving television programming and its effect on our children, I would suggest that you just open your eyes and look around. The crime rate and violent behavior have increased proportionally to television programming.

My former sister-in-law was mentally handicapped, stuck as it were with the mind of a 5 or 6 year old and unable to verbalize her thoughts...yet she mimicked all manner of violence she observed on television. After one particular episode of a show I cannot recall, she began sneaking up behind her father with a necktie, slipping it over his head and pulling it tight as she made choking noises. I am still not sure why her parents chose to treat it as a joke, going along with her and making choking noises of their own?but this was behavior she was reenacting. On another occasion, she threw a rather large kitchen knife at me, something else she had seen on television. Lately, all I have to do is observe the differences in my grandchildren at play after having either watched television or spent their day playing on their own. They are much more aggressive after a day with the television. The violence and gore observed by our children has reached ridiculous proportions and I would like to respectfully request that your oversight in this matter be addressed.

Sincerely,

Susan Dubick

Commissioner Copps:

For those of you still not concerned about how your lack of oversight involving television programming and its effect on our children, I would suggest that you just open your eyes and look around. The crime rate and violent behavior have increased proportionally to television programming.

My former sister-in-law was mentally handicapped, stuck as it were with the mind of a 5 or 6 year old and unable to verbalize her thoughts...yet she mimicked all manner of violence she observed on television. After one particular episode of a show I cannot recall, she began sneaking up behind her father with a necktie, slipping it over his head and pulling it tight as she made choking noises. I am still not sure why her parents chose to treat it as a joke, going along with her and making choking noises of their own?but this was behavior she was reenacting. On another occasion, she threw a rather large kitchen knife at me, something else she had seen on television. Lately, all I have to do is observe the differences in my grandchildren at play after having either watched television or spent their day playing on their own. They are much more aggressive after a day with the television. The violence and gore observed by our children has reached ridiculous proportions and I would like to respectfully request that your oversight in this matter be addressed.

Sincerely,

Susan Dubick
